

Justin Conner
636-439-3121 | www.justinconnerportfolio.com | Saint Louis, MO

Professional Summary:

Detail-oriented problem solver, skilled in Full Stack Developer with Agile SDLC methodologies. Proficient in designing and developing web applications delivering high-quality applications with effective database solutions using MS T-SQL, SQL Server Management Studio, MySQL, MongoDB and Oracle. As a business owner of a small full-service IT company, I have honed strong problem-solving and communication skills with a focus on requirements gathering and tailoring solutions to meet client needs, including offering the latest security options for server hosting and management in my data center. Utilizing Open VAS (vulnerability scanning, Ansible (server maintenance tasks), Nagios (resource management), Watchtower (docker container maintenance) and secure access to server resources via Cloud Fare and Router VPN.

Technical Skills:

HTML 5	CSS	JavaScript	Typescript
C#	Python	Angular	React
Bootstrap	NodeJS	SQL	TSQL
Oracle Db	Microsoft SSMS	MySQL	MongoDB
XML	JSON	CSV	Linux (Ubuntu)
ThreeJS	DJANGO	.NET	Entity Framework
ETL	Shell Scripts	Git	Cisco IOS

Education:

Webster University, Webster Groves, MO

S&T University of Missouri, Rolla, MO

Launch Code, St. Louis, MO

Ohm Lotus Phoenix- St. Louis, MO

Owner

8/17/19 - Present

Maintenance of multiple servers: task and resource management, live patching, server hardening by using industry best practices. Server software: Ansible, OpenVAS, Watchtower (Docker), Kali Linux, Nagios and Suricata (Intrusion Detection and Prevention Systems). Full stack web development and database administration. Installation of complete enterprise networks: Servers, access points, CCTV, VOIP systems, IDF/MDF, network cabling, point of

Sales PC's and CC systems, Digital displays, routers, firewalls and network switches. Web hosting in data center built and secured to meet industry standards and best practices (ISO/IEC 27001:2013). Custom software solutions for SAAS and installable OS configurations

8/20/18 -1/11/19

US Bank

Database Administrator

Agile environment with daily SCRUM. Metadata reporting on commonly queried tables using Oracle APEX for dashboard. Cross Platform data migration (Oracle to Netezza). ETL using Informatica, Python scripting and Procedural SQL.

The Resource Group - St. Louis, MO.

Contract Coordinator

6/14/17-8/17/17

Created VBA script for email verification using outlook and excel VBA libraries. Custom Excel workbooks to cleanse data and verify for accuracy in ETL process. R Studio data extraction from Excel to histogram for gap analysis reporting. ETL from legacy system to new Novatus VMS.

First Bank - Hazelwood, MO.
